

City Park Playground Information

This summer, a safety audit was performed on the Morristown city park playground area and equipment. Some pieces had to be removed, due to them being unsafe. Our Public Works Operators also tilled the pea rock around the other equipment to bring it back to the necessary fall protection that is required.

The Morristown Commercial Club, the City of Morristown and other organizations are earmarking funds to begin a playground project. The project includes updating, replacing and adding new park play equipment.
